

Stairwell macOS Forwarder 1.4.0

Release Notes

Version: 1.4.0.886

Date: Oct 30, 2023

New Features

- Backscan now checkpoints progress, and starts from there when interrupted by a reboot or shutdown. [FOR-29]
- Additional metadata is logged for assets, including hostname and IP address. [FOR-54]
- Anti-tamper protection prevents other processes from messing with the forwarder's files. [FOR-45]

Bug Fixes

- The forwarder no longer skips symbolic links when back-scanning. [FOR-86]
- Assets are now identified by their hostname & MAC address. This makes it easier to distinguish between assets that have been re-formatted and reused for different users. [FOR-23]
- There have been performance enhancements for backscan. [FOR-12]
