

Stairwell macOS Forwarder 1.7.0

Release Notes

Version: 1.7.0.1422

Date: Jan 13, 2026

Bug Fixes

FOR-720 Update operations timeout sometimes

Forwarder updates from the Stairwell web UI are now more-reliable.

QA-57 Forwarder seems not to get the Sleep action from the console properly

Previous versions of the Mac forwarder would not show their sleep/wake status correctly in the Stairwell assets dashboard.

New Features

FOR-762 Support “scan” action

The MacOS forwarder now supports the “Run backscan” action from the Stairwell dashboard.

FOR-763 Support remote log retrieval

The MacOS forwarder can now collect debugging logs and upload them to Stairwell on request for customer support purposes.
