

Stairwell Windows Forwarder 1.7.9 Release Notes

Version: 1.7.9.1

Date: Mar 31, 2026

New Features

- None

Enhancements

- None

Bug Fixes

- Compatibility issue when saving older Microsoft Office (.doc and .xls) files has been resolved (FOR-788)
- Forwarder registration fails on localized Windows due to non-ASCII characters in the User-Agent header (FOR-789)

Thirdparty Components

- None

Known Issues

- When the driver is disabled, the forwarder still attempts to sight files when they are executed. File sightings may be missed on volumes added after the forwarder starts, for example, on removable USB. In some cases, the OS provides the forwarder an unexpected path, and the forwarder skips the file. (FOR-521)
- We recommend installing to the default directory. If you install to a custom directory and upgrade, the upgraded version will be installed to the default directory (FOR-258)
- Updating from 1.4.x to this release is not supported. You can either update to 1.5.1 first (which requires a reboot to succeed) or you can manually uninstall 1.4.x and then install this release (FOR-357)
